

National Seminar Series in Organic Chemistry

Friday 16th of April @ 11:30-12:00

NHC-catalysis in organic synthesis and materials development

Dr. Henrik Sundén @ Gothenburg University

Venue: <https://gu-se.zoom.us/j/7710954816>

Join us for the National Organic Chemistry Seminar Series! Every month we will host researchers in the field of Organic Chemistry for presentations on cutting-edge research conducted at Swedish research institutes. The seminars are open to academic staff, postdoctoral fellows, PhD students, and students at all Swedish universities.

The boundaries set upon us all have stood in the way for opportunities for research exchange between the Swedish universities. This new digital venue for exchange aims to strengthen such opportunities and act in an introducing capacity for students, postdocs and others. This seminar series feature a short talk the first Friday every month throughout the year, initially involving PIs with the intent to change focus to contributions from students and postdocs.

Hope to see you all on Zoom 16th of April.

Svenska Kemisamfundet är en ideell förening öppen för alla kemiintresserade. Vi har som mål att främja utvecklingen av kemin och dess tillämpningar. Bli medlem på kemisamfundet.se
