

# National Seminar Series in Organic Chemistry

Friday February 3 at 11:30-12:00

**Tours and detours in the synthesis of triquinane natural products using light and electrons**

Prof. Daniel Strand, Lund University

Venue: <https://chalmers.zoom.us/j/65857382549>

Teachers, researchers, postdocs, students at all levels, members of Kemisamfundet and all others with an interest in the research conducted at Swedish Universities focused on organic chemistry, you are all cordially invited to this digital short seminar of a series of monthly seminars during 2022/23 (and possibly beyond).

This digital venue for exchange aims to strengthen opportunities for research exchange between the Swedish universities. and and act in an orienting capacity for students, postdocs and others. This seminar series features a short talk the first Friday every month throughout the year, initially involving PIs with the intent to change focus to contributions from students and postdocs.

Hope to see you all in Zoom on December 2.

Svenska Kemisamfundet är en ideell förening öppen för alla kemiintresserade. Vi har som mål att främja utvecklingen av kemin och dess tillämpningar. Bli medlem på [kemisamfundet.se](https://kemisamfundet.se)
