

# Nordic Seminar Series in Organic Chemistry

Wednesday April 22 at 11:30-12:00

“Escape from Flatland via Photocatalyzed Dearomative Reactions ”

Assistant Prof. Dr. Peter Dinér

KTH, Sweden

Venue: [Teams Link](#)

*Please note the Teams link for this occasion only!*

Teachers, researchers, postdocs, students at all levels, members of Kemisamfundet, Norsk Kjemisk Selskap, and all others with an interest in the research conducted at universities and industry in the Nordic Countries focused on organic chemistry, you are all cordially invited to this digital short seminar of a series of monthly seminars.

This digital venue for exchange aims to strengthen opportunities for research exchange between the Nordic universities and act in an orienting capacity for students, postdocs and others. This seminar series features a short talk, generally the first Wednesday every month throughout the year, including contributions from speakers from other Nordic countries as well as from industry.

Hope to see you all on Teams.
