

Chemistry Europe Travel Grant

Take Your Research Across Borders

Voices from the field

“Truly innovative ideas come from connecting research areas, which you would find incompatible at first sight. Only if we are curious enough to expand our horizon towards seemingly unrelated ideas and make an effort to understand different schools of thinking, can we harvest such ideas.”

Dr. Katharina Ehrmann (Austrian Chemical Society)
Based in: Institute for Applied Synthetic Chemistry, TUW
Travelled to: Rijksuniversiteit Groningen, The Netherlands

“The Chemistry Europe Travel Grant allowed me to perform a short research stay in an internationally recognized research institution, and to perform experiments using devices that are simply not available in my country.”

Attila Kormányos (Hungarian Chemical Society)
Based in: University of Szeged
Travelled to: Helmholtz Institute Erlangen-Nürnberg, Germany

“I would recommend this scheme to other early career researchers to get a head start as an independent academic, to collaborate with other scientists that you'd like to work with and gain skills/experience from, and to practice your hand at writing your own research proposals!”

Daisy Pooler (Swedish Chemical Society)
Based in: Royal Institute of Technology, KTH
Travelled to: St. Andrews in Scotland, UK

15

Member countries selecting
awardees annually

€2.000

Travel support per recipient

1-2

Months abroad

How to apply

- 1 Prepare your CV, a motivation letter, and a list of your five key publications
- 2 Apply through your National Chemistry Europe society. (Please check with your society for submission instructions.)

Applications are open until

October 15, 2026
