

Nordic Seminar Series in Organic Chemistry

Friday September 4 at 11:30-12:00

"Synthetic ErbB2 Transmembrane Peptides with Surface-Active Ionic Liquids for Selective Cancer Targeting "

Prof. Alesia A. Tietze
Göteborgs Universitet

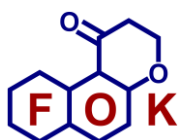

Venue: <https://gu-se.zoom.us/j/69239093755>

Please note the zoom link for this occasion only!

Teachers, researchers, postdocs, students at all levels, members of Kemisamfundet, Norsk Kjemisk Selskap, and all others with an interest in the research conducted at universities and industry in the Nordic Countries focused on organic chemistry, you are all cordially invited to this digital short seminar of a series of monthly seminars.

This digital venue for exchange aims to strengthen opportunities for research exchange between the Nordic universities and act in an orienting capacity for students, postdocs and others. This seminar series features a short talk, generally the first Wednesday every month throughout the year, including contributions from speakers from other Nordic countries as well as from industry.

Hope to see you all on Zoom.
